

BRITISH
FIRES

// NEW FOREST ELECTRIC SERIES

// WELCOME TO BRITISH FIRES

At British Fires the design and development team has one mindset, uncompromising quality, which drives us to deliver top-end products. Our aim is to help you create a peaceful and relaxing environment.

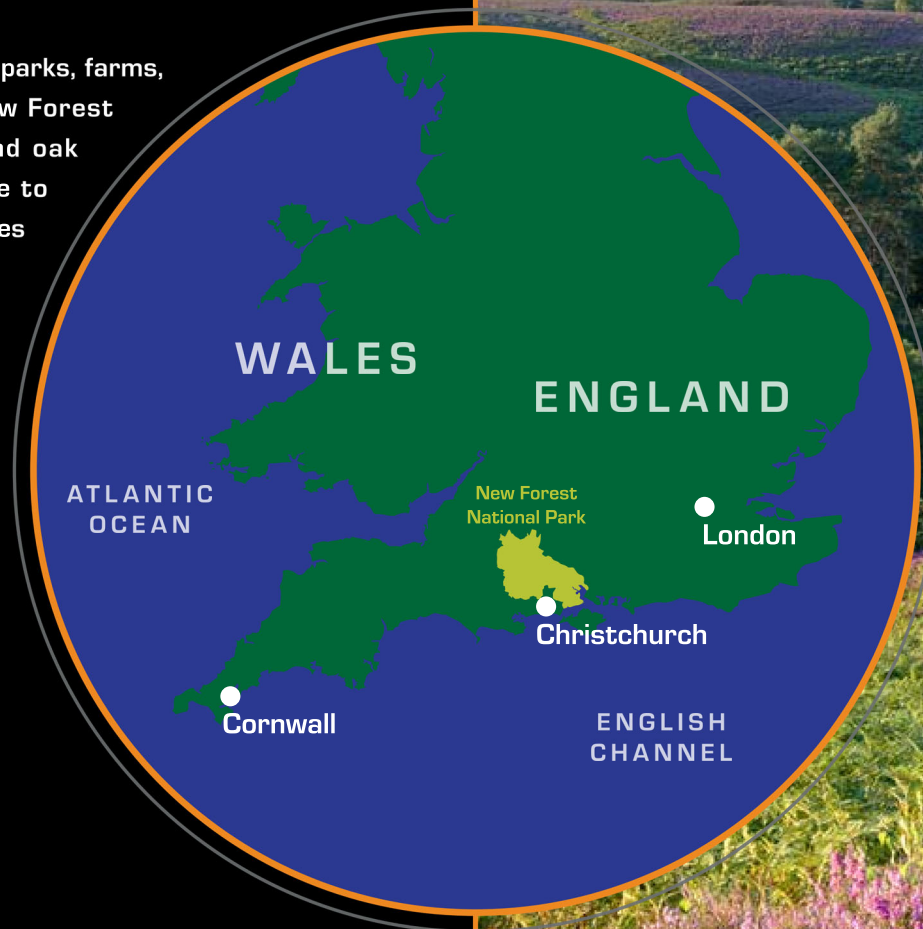

NATURAL INSPIRATION

Situated on the beautiful south coast between Cornwall and the bustling City of London is the New Forest National Park — the inspiration of our New Forest Electric Fireplaces.

The New Forest covers 219mi² and is home to many parks, farms, golf courses, and outdoor activities. Today, the New Forest is populated mostly by birch, beech, conifers and oak trees. There are also vast areas of heathland due to cultivation from the Bronze Age and prior which gives the National Park its unique terrain and geography.

This diverse makeup of the New Forest is what gave us the inspiration to develop the fuel bed setting that comes standard with every fire.

THE NEW FOREST NATIONAL PARK

**YOU WON'T BELIEVE
IT'S ELECTRIC**

NEW FOREST 48"

Features

Award-winning LED flame-effect technology.

Three Fuel bed Media options: Forest View, Slate View, Diamond Light.

Adjust temperature, lighting, colors & flame-effects with the remote control.

Daily and weekly timer options.

Dimensions

Width	1200 mm	47¼ in
Height	565 mm	22¼ in
Depth	300 mm	12½ in

Product specifications

Heat output: 1500W

Supply voltage: 120V AC

Rating power: 60Hz

Lighting: LED

See page 37 for additional dimensions

Installation options

Front-Facing 

Two-Sided 

Three-Sided 

See page 31–34 for Installation images

DIMENSIONS

NOTICE THE DEPTH OF THE FUEL BED?

Due to the innovative engineering of the New Forest's Air Curtain Technology we have been able to design a deeper fuel bed than most on the market. As a result, the glass is pushed to the edge of the firebox creating a nearly flush design. This also allows the logs to be larger and more realistic in size.

7.8 INCHES

3-D DOWNLIGHT-EFFECT

Our award-winning LED flame technology is impressive by itself. It becomes even more amazing when the down-lights are turned on.

The down-lighting effect illuminates the reflective mirror resulting in a brighter fuel bed while creating the illusion of a deeper looking fuel bed. This transcends the overall effect of the New Forest Electric Fire and creates a prominent focal point within the room.

DOWNLIGHTS OFF

LED flame-effect take centre-stage

Fuel bed glow is boosted creating a sparkling glow

DOWNLIGHTS ON

Flames appear to be between two sets of logs

Downlights create a 3-D effect by illuminating the logs and reflecting on the rear-glass mirror

The signature logs are brought to life by illuminating the details

DETAIL IS EVERYTHING

The details of the signature New Forest log design is at the heart of our, *Uncompromising Quality* promise. They are touted as some of the best and most life-like logs on the market — not only for the small details, which are inspired by England's New Forest National Park — but also in the weight and durability they possess.

FOREST VIEW

The signature logs are a result of detail-oriented research of tree types typically found in the New Forest National Park. To further enhance the realistic effect, each log is hand-painted, adding unique details and an overall impressive view.

Underneath the New Forest logs sits a bed of diamond crystals and husk. This combination creates an earthy, yet, vibrant feel with lights from below adding a shimmer of sparkle.

*Included with standard model

SLATE VIEW

A dynamic way to enhance the lighting of the New Forest is with the Slate View. To introduce more light from underneath, the fuel bed tray is flooded with crystals along with several pieces of slate and finish the signature logs. This setup allows more light and brightens the overall focal point.

One setting that can take you through a journey of tranquillity is the auto-transitioning of all three fuel bed colours. The seamless changing of colours creates a vibrant mood and atmosphere.

*Included with standard model

DIAMOND LIGHT

This fuel bed setting is all about light, colour, and flames. Small crystals, along with several larger crystals, create a sea of sparkle and sensation. Due to the absence of the New Forest logs, the flame-effect's raw elegance is exposed.

* Included with standard model

HOW DOES AIR CURTAIN TECHNOLOGY WORK?

Our Air Curtain Technology* is at the heart of the New Forest Electric's innovation. This process includes circulating cooler room air in and then distributing warmed air back into the room via our dual-outlet system. The outlet is shaped to push air out in a wide path to get heat into every corner of the room.

Because the heater outlet sits at the top we are able to position the glass to be nearly flush with the edge of the fire box. This means you get a wall inset fire with a clean and contemporary appearance.

AIR CURTAIN TECHNOLOGY®

USA/Canada Patent Pending

INSTALLATION TO SUIT YOU

There isn't a wrong way to install your New Forest Electric Fire... just your way... choose whichever suits your desire.

The installation process is straight-forward and simple to complete. All you need to furnish is a power source and a wall or false chimney breast to setup the New Forest.

The expertly designed New Forest allows you to cover what is not necessary to see and expose only the true beauty of the fuel bed components and award-winning LED flame-effect technology.

FRONT-FACING

CORNERED

THREE-SIDED

BE IN CONTROL

The New Forest is equipped with a remote control that bridges the connection between you and your fireplace. Each button displays an icon that clearly identifies the function to engage with the fire and explore the features.

Open window detection

If there is a sudden drop in temperature of 9°F or more within a ten minute period, the heater will automatically turn off to preserve energy. Look out for the OP sign on the digital display to show this has been activated. The heater will start up again once the temperature in the room rises or you choose to manually turn it back on.

Thermostatic heating

The Air Curtain Technology® heater system is thermostatically controlled using the remote handset which displays the current setting on the LCD screen. Choose a temperature between 62° and 80°C and the fire will do the work to heat the room to your desired temperature.

Flame control

Choose from four settings to adjust the brightness of the flame to suit your mood. Watch as the flames change brightness and height.

Down lighting

Select to have the carefully placed spot lights on and see every detail of the fire. Turn them off and you will see how relaxing the fuel bed can really be.

Fuel bed colour change

Cycle through all of the three colours that each provide a unique style. Can't decide... the cycle setting will flow through all the colours for you.

Daily and weekly timer

Set the fire to provide you with heat on any day throughout the week. The seven-day programmable calendar will remember your settings and will activate the thermostatic heater on each day and every week for when you need the New Forest fire the most.

Timer boost

A range of settings between one and nine hours can be selected to turn the heater on for a desired length of time.

NEW FOREST 48"

Dimensions:

A	1175.0 mm	46¼ in
B	565.0 mm	12½ in
C	1200.0 mm	47¼ in
D	565.0 mm	22¼ in
E	424.0 mm	16¾ in
F	300.0 mm	11¾ in
G	55.5 mm	2½ in
H	67.0 mm	2⅝ in
I	83.5 mm	3⅓ in

Specifications:

Supply voltage:	120V AC
Rating power:	60Hz
Fuse rating:	13 Amp
Lighting:	LED

Features:

- Outlet plug with 6ft. long cord
- All fuel bed items included
- Remote control included

NEW FOREST 63"

Dimensions:

A	1575.0 mm	62 in
B	300.0 mm	12 $\frac{1}{8}$ in
C	1600.0 mm	63 in
D	565.0 mm	22 $\frac{1}{4}$ in
E	424.0 mm	16 $\frac{3}{4}$ in
F	300.0 mm	11 $\frac{3}{4}$ in
G	55.5 mm	2 $\frac{1}{8}$ in
H	67.0 mm	2 $\frac{5}{8}$ in
I	83.5 mm	3 $\frac{1}{3}$ in

Specifications:

Supply voltage:	120V AC
Rating power:	60Hz
Fuse rating:	13 Amp
Lighting:	LED

Features:

- Outlet plug with 6ft. long cord
- All fuel bed items included
- Remote control included

WARRANTY

2-year limited parts warranty – At British Fires we pride ourselves on quality and performance, so much so that each British Fires electric product is applicable for a 2-year warranty when purchased from an authorised dealer. Full terms and conditions are available to view at www.britishfires.com.

All appliances must be installed in a correctly ventilated space in accordance with the manufacturer's installation instructions and the rules in force. This brochure is for guidance only and is not intended to replace the installation manual, which provides more details information. All of our products carry CSA approval.
